Subject: Requested KMCO Updates

Hello Mark and Vista,

We are requesting daily written update of the clean-up/mitigation operations on-site.

As it was explained to me earlier today that the facility is currently not operational. However, we would like to receive updates regarding what actions are being taken place by KMCO regarding the clean-up efforts conducted within the facility and off property.

In addition, we are requesting updates on the tank locations with fire water (that contains product), capacity of those tanks, along with the volume transferred to those tanks.

Please send updates to:

Spill12@tceq.texas.gov

Moore.Gary@epa.gov

Subject "KMCO Update 04.XX.19"

Also I was wondering what are the current operational hours regarding the clean-up/mitigation operations on-site?

Thank you,

Tina Tran
